## CTMS: Test cases for use case 1.1

This page last changed on Sep 25, 2008 by iyerk.

Use case context: 1.1 Enter AEs - caAERS UC https://wiki.nci.nih.gov/x/4pR8

User Selects a specific study / subject combination. User chooses to add new period of observation.  1.1 User creates reporting period that overlaps with existing reporting period, but allow user to continue without changes  1.2 User creates Caaers should reporting period that throw error/warning has a gap with the message for gap in last reporting period that throw error/warning has a gap with the message for gap in last reporting period that preceded all existing reporting period with preceded all existing reporting period with for invalid date invalid date range. [start date value]  1.4 User creates a reporting period with for invalid date invalid and tar range. [start date value]  1.5 User creates a reporting period with for invalid start date [for example MM=15]  1.6 User creates a reporting period with for invalid start date [for example MM=15]  1.7 User enters text [instead of integer] for specifying cycle number for a new reporting period.  1.8 User enters text (specifying for invalid cycle number for a new reporting period of type "baseline".  1.9 User creates two reporting period of type "baseline" type reporting period of type "baseline" type reporting period.  1.9 User creates two reporting period of type "baseline" type reporting period of type "baseline" type reporting period.  1.9 User creates two reporting period of type "baseline" type reporting periods.  1.9 User creates two reporting period of type "baseline" type reporting periods.  1.0 User creates two reporting period of type "baseline" type reporting periods.		Scenario	Expected behavior	expected	actual	pass/fail
Subject combination. User chooses to add new period of observation. User creates reporting period. Hat overlaps with existing reporting period, but allow user to continue without changes  1.2 User creates Casers should reporting period that throw error/warning has a gap with the existing reporting period. Iser creates Casers should last reporting period. Iser creates Casers should law user to continue without changes  1.3 User creates Casers should allow creation of new reporting period with for invalid date invalid date range. Istart date value is later than end date value]  1.5 User creates a reporting period with for invalid start date [for example MM=15]  1.6 User creates a Casers gives error reporting period with invalid start date [for example MM=15]  1.6 User ereates a Casers gives error reporting period with for invalid end date. Invalid month [22/17/2008] is converted to valid date [10/17/2009]  1.7 User enters text [Instead of integer] for specifying yellow.  1.8 User enters ve [Instead of integer] for specifying yellow.  1.9 User creates two reporting period.  1.9 User enters ve integer for specifying for invalid cycle number for a new reporting period.  1.9 User creates two reporting period of type "baseline" type reporting periods.	1					1
User creates reporting period.  1.2 User creates reporting period that overlaps with existing reporting period that great the existing reporting period.  1.2 User creates reporting period that throw error/ warning message for overlapping reporting period that throw error/warning has a gap with the reporting period that throw error/warning has a gap with the reporting period.  1.3 User creates Caaers should reporting period, but allow user to continue without changes  1.4 User creates Caaers should allow creation of new reporting period.  1.5 User creates a reporting period with for invalid date range. [start date value is later than end date value]  1.5 User creates a reporting period with invalid start date [for example MM=15]  1.6 User creates a reporting period with finvalid end date [for example MM=15]  1.7 User enters text [instead of integer] for specifying cycle number for a new reporting period.  1.8 User creates two reporting period of type "baseline", period opening periods.  2 Caaers gives error for invalid cycle number.  2 Caaers gives error reporting period.  2 Caaers gives error for invalid cycle number.  3 Caaers gives error reporting period.  4 User creates two reporting period.  5 User creates two reporting period.  6 User creates two reporting period.  7 User enters ve integer for specifying for invalid cycle number.  8 User creates two reporting period of type "baseline", type reporting period.						
add new period of observation.  User creates reporting period that overlaps with existing reporting period.  1.2 User creates Casers should reporting period that throw error/ warning message for overlapping reporting period, but allow user to continue without changes  1.2 User creates Casers should reporting period that throw error/warning has a gap with the last reporting period. Put allow user to continue without changes  1.3 User creates Casers should allow creation of new reporting period with at preceded all existing reporting period with for invalid date invalid start date value]  1.5 User creates a reporting period with for invalid date invalid start date value   Start date value   MM=15   Suser creates a reporting period with invalid start date [for example MM=15]   Casers gives error reporting period with for invalid start date [10/17/2008] is converted to valid date [10/17/2009]   No error is thrown. Invalid month [22/17/2008] is converted to valid date [10/17/2009]   No error is thrown. Invalid month [22/17/2008] is converted to valid date [10/17/2009]   No error is thrown. Invalid month [22/17/2008] is converted to valid date [10/17/2009]   No error is thrown. Invalid month [22/17/2008] is converted to valid date [10/17/2009]   No error is thrown. Invalid month [22/17/2008] is converted to valid date [10/17/2009]   No error is thrown. Invalid month [22/17/2008] is converted to valid date [10/17/2009]   No error is thrown. Invalid month [22/17/2008] is converted to valid date [10/17/2009]   No error is thrown. Invalid month [22/17/2008] is converted to valid date [10/17/2009]   No error is thrown. Invalid end date [10/17/2009]						
User creates reporting period that overlaps with existing reporting period.  User creates reporting period that throw error/ warning message for overlapping reporting period, but allow user to continue without changes  User creates reporting period that throw error/warning has a gap with the last reporting period. reporting period that preceded all existing reporting period. reporting period with invalid start date for example MM=15 ]  User creates a reporting period with invalid end date [for example MM=15]  User creates a reporting period mixed and reporting period. 1.11	User creates reporting period of type "post-treatment", when the only existing reporting period has the type "baseline", and doesn't mention the date of first course.	Caaers gives error for unknown date of first course.	No error is thrown	×
1.12	User mentions invalid date of first course.	Caaers gives error for invalid date.		<b>②</b>
1.13	User does not specify any treatment assignment for a particular reporting period and saves the reporting period.	Caaers gives error for unspecified treatment assignment code.		<b>②</b>
1.14	User doesn't specify a reporting period	caAERS gives an error for missing reporting period type	2	<b>②</b>
2	User has chosen appropriate study / subject / reporting period with type of treatment or post treatment.			
2.1	User chooses an existing study-subject-reporting period combination. He edits one of the existing AEs and saves it.	The AE is saved without error.		<b>②</b>
2.2	User chooses an existing study-subject-reporting period combination. He deletes one of the existing AEs and saves it.	The AE is saved without error.		<b>②</b>
2.3	User enters information for some of the solicited AEs. Then user specifies an observed AE term that is a duplicate of one of the solicited AEs and clicks save.	I	caaers does not allow addition of duplicate AEs	0

2.4	User does not add information to any solicited AE. In observed AEs section, user specifies an AE term that is in the solicited AEs list and clicks save.	Caaers throws error for duplicate AEs	caaers does not allow addition of duplicate AEs	0
2.5	User marks one of the solicited AEs as grade 4 AE, enters info in all required fields for that AE, and clicks save.	Caaers informs user that expedited reporting is required		<b>②</b>
2.6	User marks one of the observed AEs as grade 4 AE, enters info in all required fields for that AE, and clicks save.	Caaers informs user that expedited reporting is required		0
2.7	User marks one of the AEs [observed or	expedited reporting, prompts user to select other AEs		<b>②</b>
2.7.1	User adds one of the lower grade AEs to expedited report flow.	Caaers allows user to add lower grade		<b>②</b>
2.8	User specifies the same CTC term twice when adding observed AEs and clicks save.	Caaers throws error for duplicate AEs	caaers does not allow addition of duplicate AEs	<b>②</b>
2.9	When user specifies a grade for a solicited AE he should be able to see the following selection to choose from:			•
	<ul> <li>Please select</li> <li>Not evaluated</li> <li>Grade 0 - Evaluated, but not present (description)</li> <li>grades 1-5: [show CTC term specific grade descriptions]</li> </ul>			
2.10	When user specifies a grade for an observed AE he should be able to see the following selection to choose from:			<b>②</b>
	• Please select			

	<ul> <li>grades         <ul> <li>1-5: [show</li> <li>CTC term</li> <li>specific grade</li> <li>descriptions]</li> </ul> </li> </ul>			
2.11	Once user has filled in all information for a specific CTC term, caaers should automatically fill in expectedness information.	(this may be changing)		?
2.12	User chooses 'Other - specify'. caAERS should bring up a field to enter the meddra term or AE info. The verbatim field should also still appear			<b>②</b>
2.13	User chooses 'Other - specify' but does not enter anything into the "Other" text field	Caaers throws error for blank 'other' field	No error is thrown	×
2.14	User specifies a solicited AE term with grade 0. He does not enter any other information and clicks save.	Caaers allows user to save AE without mentioning any attributes if CTC grade = 0. [ for ex: hospitalization, verbatim etc even if marked mandatory by rules should be overidden here.]		<ul><li>•</li></ul>
2.15	User creates and submits an expedited report. Then user chooses the same study- subject-reporting period combination and adds another AE with grade 4 and clicks save	Caaers prompts user that the AE is being added to the existing expedited report and gives the user the option to include	)	?
2.16	User creates and submits an expedited report. The user chooses the same study-subject- reporting period combination and adds other observed (non-serious) AEs to it and then clicks			?
2.17	save User enters observed AEs and then saves but doesn't answer "attribution to study"			<b>②</b>
2.18		dcaAERS throws error for blank grade		<b>②</b>

2.19	without entering Grade User specifies a solicited AE term with grade of "Not evaluated". He does not enter any other information and clicks save.	CTC grade = not evaluated. [ for ex: hospitalization, verbatim etc even if marked mandatory by rules should be		<b>②</b>
2.20	user has not entered information for all solicited AEs when he saves the changes of the reporting period	overidden here.] caAERS throws a warning that the solicited AEs have not all been reported on, with the option to go back and/or continue	i	?
3	User has chosen appropriate study / subject / reporting period with type of baseline			
3.1	User chooses the existing study-subject-reporting period combination. He edits one of the existing AEs and saves it.	The information about solicited AEs and observed AEs is reflected correctly in the 'Review & Report' page	The list of observed AEs and solicited AEs is not shown on the 'Review & Report ' page	s X
3.2	User chooses an existing study-subject-reporting period combination. He deletes one of the existing AEs and saves it.	Information is saved without error.		<b>②</b>
3.3	User enters information for some of the solicited AEs. Then user specifies an observed AE term that is a duplicate of one of the solicited AEs and clicks save.	I	caaers does not allow addition of duplicate AEs	<b>②</b>
3.4	User does not add information to any solicited AE. In observed AEs section, user specifies an AE term that is in the solicited AEs list and	Caaers throws error for duplicate AEs	caaers does not allow addition of duplicate AEs	<b>②</b>
3.5	clicks save. User marks one of the solicited AEs as grade 4 AE and clicks save.	caAERS allows user to save AE without mentioning any attributes/reporting since type=baseline		<b>②</b>

3.6	User marks one of the observed AEs as grade 4 AE and clicks save.	caAERS allows user to save AE without mentioning any attributes/reporting since type=baseline	rules for attribution and hospitalization are fired although these are not applicable to reporting period type = baseline	**
3.7	User marks one of the AEs [observed o solicited] as grade 4 and others as grade 2 and saves	, mentioning any attributes/reporting	For both low grade and high grade AEs caaers gives error for 'Missing Attribution to study'	*
3.8	User specifies the same CTC term twice when adding observed AEs and clicks save.	Caaers throws error for duplicate AEs	caaers does not allow addition of duplicate AEs	<b>②</b>
3.9	When user specifies a grade for a solicited AE he should be able to see the following selection to choose from:			<b>Ø</b>
3.10	Please select Not evaluated Grade 0 - Evaluated, but not present (description) grades 1-5: [show CTC term specific grade descriptions] When user specifies a grade for an observed AE he should be able to see the following selection to choose from:			<b>②</b>
	<ul> <li>Please select</li> <li>grades</li> <li>1-5: [show</li> <li>CTC term</li> <li>specific grade</li> <li>descriptions]</li> </ul>			
3.11	Once user has filled in all information for a specific CTC term, caaers should automatically fill in expectedness	(this may be changing)		?
3.12	information. User chooses 'Other - specify' for observed AE. caAERS should bring up a field to enter the meddra term/ Al info. The verbatim			<b>Ø</b>

3.13	field should also still appear User chooses 'Other - specify' but does not enter anything into the "Other" text field	error for blank 'other' field	No error is thrown	*
3.14	User specifies a solicited AE term with grade 0. He does not enter any other information and clicks save.	caAERS allows user to save AE without mentioning any attributes/reporting since type=baseline		<b>②</b>
3.15	User enters observed AEs and then saves but doesn't answer "attribution to study"			X
3.16	•	dcaAERS throws error for blank grade		<b>②</b>
3.17	User specifies a solicited AE term with grade of "Not evaluated". He does not enter any other information and clicks save.			<b>②</b>
3.18	user has not entered information for all solicited AEs when he saves the changes of the reporting period	caAERS throws a warning that the solicited AEs have not all been reported on, with the option to go back and/or continue	i	•
3.19	User chooses the existing study-subject-reporting period combination. He edits one of the existing AEs and saves it.	The rules engine should not fire for baseline reporting period types and no AEs are reportable ir 'review and report' page.	า	<b>②</b>

- Can user change existing reporting period start / end dates?
  User needs to specify start date of first course. Shouldn't this be done at the study level? It this information required for a particular study or study subject, or study subject reporting period combination?
